Steve,

Show up at any time you need to. Just let me know when you think you will be stopping by so I am up at the front office.

Mike

Mike,

Can you meet earlier. We are assembling with the State and USEPA at 230 to go over our agenda for the meeting.

Thanks Mike,

Meeting up before the availability session would be better for me. How about early afternoon around 1 or 2 PM?

Steve,

I have attached the boring logs from GZA's drilling efforts this year.

I have an update for the WD Grain/LaSalle County Farm Supply gasoline UST that is thought to have been located on land Wedron Silica purchased.

I talked to the individual (Daniel McFadden) that pressure tested that vessel in 1983. Dan indicated that the WD Grain/LaSalle County Farm Supply vessel was located at the retail station across County Highway 21 from the Doyle Hoxey station. This location is not what is presented on the "not to scale" drawing put together by the Fire Marshal.

I would like to talk to you about this finding tomorrow. Do you want to talk at Serena before the public information meeting? Alternatively, you could come over to Wedron Silica before the public information meeting.

Just let me know.

Mike

Mike,

I checked all of my files and cannot find the well logs for the installation of the 9 monitoring wells by GZA and Boart Longyear in May/June. Could you or Bernie send those over to me.

Thanks,

Steve
